

Tariq Mehmood

Full Stack MERN Developer | AI Integration & DevOps

+923325293542 | tmtariq110@gmail.com | Pakistan | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 2+ years of experience building, deploying, and maintaining modern web applications and production systems. Specialized in the MERN stack (JavaScript, React.js, Node.js, Express.js, and MongoDB), with expertise in RESTful APIs, authentication, database architecture, and responsive frontend development. Experienced in SaaS, healthcare workforce management, e-commerce, logistics and freight platforms, and AI-powered chatbots and automation.

Experienced in production deployments, Linux, Nginx, PM2, DigitalOcean, Git, GitHub Actions, and CI/CD. Skilled in integrating OpenAI, Anthropic Claude, and Google Gemini, and building AI assistants, agents, document verification, semantic search, and RAG solutions. Proficient across the full software lifecycle, from frontend and backend development to databases, deployment, debugging, and production support.

TECHNICAL SKILLS

- Languages:** JavaScript, TypeScript, SQL, PHP
- Frontend:** React.js, Next.js, Tailwind CSS, Bootstrap, Responsive Web Design
- Backend:** Node.js, Express.js, RESTful APIs, JWT Authentication, Bcrypt, API Integration
- Databases:** MongoDB Atlas, MongoDB Compass, MySQL, Database Design, Data Modeling
- State Management & Architecture:** React Router, Context API, Redux, MVC Architecture, Role-Based Access Control
- AI & Automation:** OpenAI APIs, Anthropic Claude, Google Gemini, AI Chatbots, AI Agents, OpenClaw, RAG, Semantic Search, Vector Embeddings, Document Verification, AI Workflow Automation
- AI / ML Tools:** Sentence Transformers, Hugging Face, Text Embeddings, Vector Databases
- DevOps & Cloud:** DigitalOcean, Nginx, Linux, PM2, GitHub Actions, CI/CD, Production Deployment, Server Administration
- Development Tools:** Git, GitHub, npm, Postman
- Other:** Web Scraping, SEO, Payment Integrations, Email Services, SMS Integrations, Google Maps API, Meta Pixel, Third-Party API Integrations

PROFESSIONAL EXPERIENCE

MERN Stack Developer / Full Stack Developer	<i>30 June 2025 – Present</i>
RatedSol Tech — Dera Ghazi Khan, Punjab, Pakistan	
- Develop full-stack MERN applications using React.js, Node.js, Express.js, and MongoDB, including REST APIs. - Professionally created Authentication, authorization, database design, and third-party integrations. - Build responsive UIs with React.js, Tailwind CSS, Material UI, and Bootstrap for production applications across healthcare. - Manage production environments using Linux, Nginx, PM2, DigitalOcean, Git, GitHub Actions, and CI/CD workflows. - Troubleshoot the deployment, Administration servers, database, and API issues. - Integrate OpenAI, Anthropic Claude, and Google Gemini to develop AI chatbots, AI agents, product recommendations, document verification, customer support, and lead-generation solutions. - Develop freight management systems covering jobs, transport companies, quotes, assignments, notifications, and third-party integrations including email, SMS, Google Maps, and Meta Pixel.	
Full Stack Developer	<i>July 2024 – Present</i>
Freelance & Direct Clients — Remote	
- Developed customized full-stack web applications and solutions for international clients. - Built responsive frontend interfaces and scalable backend APIs using React.js, Node.js, Express.js, MongoDB, and related technologies. - Worked on e-commerce, business management, healthcare, industrial machinery, and content-driven websites. - Managed application deployment, server configuration, production debugging, and ongoing maintenance. - Integrated third-party APIs and services based on client requirements. - Worked with Git and GitHub for source control and collaborative development workflows.	

KEY PROJECTS

RatedCare Connect (RCC)

Healthcare workforce management and nurse rostering SaaS platform designed to streamline workforce operations, scheduling, attendance, payroll, and analytics.

- Developed and maintained a healthcare workforce management SaaS platform using the MERN stack.
- Built admin features for managing businesses, practitioners, nurses, scheduling, attendance, payroll, FTE, and revenue.
- Implemented role-based access, GPS check-in/out, AI-powered document verification with Anthropic Claude, and production deployment.

Technologies: React.js, Node.js, Express.js, MongoDB, Mongoose, JWT, Anthropic Claude AI, REST APIs, DigitalOcean, Nginx, PM2, GitHub Actions

SYM Forklifts

Production website and digital platform for an Australian forklift and industrial machinery business.

- Developed and maintained an Australian industrial machinery platform, including product listings, finance, blogs, lead capture, MongoDB-based lead management, Meta Pixel, and third-party integrations.
- Built AI chatbot and agent workflows for machine discovery, recommendations, product information, FAQs, knowledge-base integration, customer enquiries, and walk-around tour videos.
- Developed freight management workflows covering job creation, machine details, pickup/delivery, company registration and approval, quote submission/acceptance, automated quote rejection, email reminders/notifications, and ClickSend SMS integration.

Technologies: React.js, Node.js, Express.js, MongoDB, Mongoose, OpenAI, OpenClaw, AI Agents, REST APIs, Google Maps API, Meta Pixel, ClickSend, Nodemailer, DigitalOcean, Nginx, PM2, GitHub Actions

The Palm • Campus Shoes

Additional production websites developed and maintained for international clients (client-facing business site, e-commerce site, and a web application), covering frontend and backend feature development, production deployment, and ongoing maintenance.

Technologies: React.js, Node.js, JavaScript, REST APIs, MongoDB

Project URLs: thepalm.com | campusshoes.com

Freight Management System

Logistics and machinery transportation management solution developed as part of the SYM Forklifts platform.

- Developed freight job management with pickup/delivery locations, machine specifications, delivery notes, and required dates.
- Built freight company registration, approval, job browsing, quote submission, and quote management workflows.
- Implemented quote acceptance, automatic rejection of unsuccessful quotes, and email notification/reminder workflows.

Technologies: React.js, Node.js, Express.js, MongoDB, Mongoose, REST APIs, Nodemailer

AI-Powered Chatbot & AI Agent

AI-powered customer assistance solution developed for an industrial machinery business.

- Developed conversational AI for customer support, product discovery, recommendations, and lead qualification..
- Integrated AI models and knowledge bases for product information, FAQs, and personalized responses.
- Built workflows for sharing machine walk-around videos and guiding customers through the purchase journey.

Technologies: OpenAI, OpenClaw, AI Agents, Knowledge Base, RAG, Vector Embeddings, Node.js, REST APIs

Grilli Restaurant Website

Responsive restaurant website developed as an additional web development project.

Technologies: HTML5, CSS3, JavaScript, Responsive Design

Project URL: <https://grilli-by-tariqmehmood.netlify.app/>

Portfolio Website

Personal developer portfolio showcasing professional experience, skills, projects, and technical capabilities.

Project URL: <https://my-portfolio-henna-beta-68.vercel.app/>

DEVOPS & PRODUCTION EXPERIENCE

- Deployed and maintained applications on DigitalOcean and Ubuntu servers.
- Configured Nginx, PM2, and production server environments.
- Set up GitHub Actions CI/CD workflows and automated deployments.
- Managed GitHub Actions runners and deployment processes.
- Worked with MongoDB Atlas and cloud databases.
- Troubleshoot production, deployment, server, and permission issues.
- Monitored and resolved application and deployment issues.

EDUCATION

Bachelor of Science – BS Information Technology (BSIT)

Ghazi University, Dera Ghazi Khan, Punjab, Pakistan

October 2023 – October 2027

Relevant Coursework: Programming Fundamentals, Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Software Engineering, Web Development, Information Security, Computer Networks, Cloud Computing
